01 PROFILE

Systems Engineer passionate about teamwork and multidisciplinary tasks. I am excited by the possibility of learning new experiences and see challenges as opportunities to grow professionally. Working in technology allows me to explore different and logical ways of solving problems, thus generating innovative ideas that contribute to the success of the team with which I collaborate. My approach to problem solving not only seeks efficiency, but also generates ideas that drive the success of the team with which I collaborate. This combination of passion and experience drives me to contribute meaningfully in dynamic and creative environments.

02 EDUCATION

Mar 2024 — Present

Bogota

Politécnico Gran Colombiano

Project Management In Business Intelligence

Jul 2019 — Apr 2022

Bogota

Politécnico Gran Colombiano

Systems Engineer at Universidad

Aug 2021 — Aug 2021

Bogota

Politécnico Gran Colombiano

Diploma in computer science

Jul 2016 — Nov 2017

Bogota

Sena

Technologist in Analysis and Development of Information Systems

Analyze and develop information systems, working as a team and developing skills with languages such as PHP and Java, including database engine, Mysql.

Jan 2014 — Nov 2015

Bogota

Sena

Technician in Software Programming

General Programming Skills, software design, software debugging, software documentation, problem solving, teamwork, software development fundamentals, software development process, software requirements.

03 EMPLOYMENT HISTORY

Sep 2022 — Present

Bogota

Technical Leader at Imaginamos

As a development team leader, I apply my strong knowledge and soft skills to foster a collaborative environment. My approach consists of delegating tasks jointly with my team, which allows us to work in harmony and achieve established objectives within the planned deadlines.

My leadership is based on the application of effective communication skills, conflict resolution and empathy. These qualities allow me to guide my team efficiently, ensuring that each member feels valued and engaged in the process.

I have led successful projects in which we have strictly met deadlines. This time management ability has been demonstrated on numerous occasions, supporting our track record of high-quality, timely delivery.

My focus is to not only achieve goals, but also cultivate a work environment that inspires excellence and continued growth. I am committed to leading with passion and dedication, ensuring our team reaches its full potential on every project.

Jul 2019 — Oct 2022

Zipaquira

Frontend Developer at Imaginamos

As a Front-End Developer, I have worked with a variety of technologies, including Loopback, React-admin, React, React Native, NextJS, Ant Design, Material-UI, Redux, and Redux Toolkit. My focus was on creating exceptional user experiences and developing high-performing web and mobile applications.

As a Full Stack Developer, I gained experience in JavaScript (React-admin, Material-UI, React, NextJS, React Native, Loopback and Redux), which allowed me to approach projects comprehensively and ensure an efficient workflow.

During this period, I also specialized in creating mobile applications with React Native and building web pages with Next.js, which brought flexibility and performance to the projects I participated in.

Additionally, I managed servers in Linux environments and carried out deployments on various platforms, such as Google Cloud and DigitalOcean.

Oct 2018 — Jul 2019

Bogota

Full stack JS Developer at Chiper S.A.S

As a Junior Front-End Developer, I had the opportunity to work with various technologies, including JavaScript (React-admin, Material-UI, React, React Native, Redux, Loopback) and MySQL. During my time at the company, I played a key role in various aspects of web and mobile development.

My responsibilities included creating modules in the management system, where I implemented Redux and Loopback to improve data management and interaction with the API. I was also responsible for developing custom filters, which allowed users to access relevant information more efficiently by consuming API endpoints.

Additionally, I contributed to the development of user interfaces in mobile applications using React Native. These screens were designed following Material-UI and Style Components guidelines, resulting in an attractive and easy-to-use user experience.

Sep 2017 — Oct 2018

Bogota

Full stack JS Developer at Imaginamos

Provided support for a wide range of technologies and systems, including WordPress, PHP, Laravel, CodeIgniter, CSS, JavaScript, jQuery and MySQL. My focus was on website management and maintenance, as well as configuring and administering servers in environments such as Linode, DigitalOcean and Site5 with Linux-based operating systems and control panels such as CPanel.

As a Junior Full Stack Developer, I worked with various technologies, including PHP, JavaScript, MySQL, Loopback, React Admin, Material-UI, React, and JQuery. Developed web applications using frameworks such as CodeIgniter, Laravel and WordPress, and worked on the Front-End using CSS, JavaScript, Bootstrap and JQuery.

I also had the opportunity to delve into Full Stack development using JavaScript, which expanded my technical skills. In addition, I gained experience in managing Linux servers and worked under the Scrum methodology for agile projects.

Jul 2017 — Aug 2017

Bogota

Data Analyst at ETB

During my internship, I provided support in port validation of ETB services, managing databases and administering ports. My role involved ensuring ETB services ran efficiently and without interruption.

In addition, I participated in the fixing of cards that were blocked. I used verification tools and made the necessary changes to restore normal operation. I also carried out network coverage tests and configured ONT, AP and PLC equipment appropriately.

My internship provided me with the opportunity to apply my knowledge and skills in a real-world environment, whilst contributing to the smooth running of ETB services. I am excited to continue learning and developing in this field.
